

Staff Responses to Council Questions
November 8, 2011

6. Consent Agenda B. Motion: Award \$17,100 to Lyons Electric Company, Inc., LaGrange, IL, for 75th Street Streetlight Removal and Storage Project

Are we sure we will be able to re-use the lights once 75th Street is widened?

The lights are not planned to be re-installed. Staff plans to store the lights and to use them as spares when other lights are damaged or knocked down, and to use them in the future in currently unlit locations where it's determined they would be appropriate.

How long of a time period between the time the signals are removed and when construction will commence?

This contract is to remove streetlight poles in late fall or early winter of 2011 in advance of the widening of 75th Street which is planned to begin in the spring of 2012.
