BACKGROUND

The Village of Downers Grove owns and operates a fast-fill compressed natural gas (CNG) fueling station located at the Public Works Facility at 5101 Walnut Avenue. CNG-powered vehicles require 24 hour per day, seven day per week access for fueling. The station was built by ANGI Energy Systems of Janesville, Wisconsin under a federal grant in 2001. Major system components include two compressors, fuel storage vessels, a gas dryer, and a dispenser.

The purpose of this contract is to provide for a proactive maintenance and support program where the contractor performs preventive maintenance and uses automatic notification capabilities of various monitoring solutions to notify the Village of impending or current problems. In addition, the contractor will be expected to review with the Village detailed reporting about the current health of the CNG station and provide recommendations for improvement on a monthly basis. The scope of services will include weekly inspection visits, monthly preventive maintenance, annual weights and measures certification, documentation of all work performed, and emergency after-hours repairs in the event of a problem.

Staff developed a Request for Proposals (RFP) seeking services from a qualified vendor to provide the specified CNG fueling station maintenance services in accordance with the Village Purchasing Policy. Proposals were received from one vendor with pricing information summarized in the table below.
