

COUNCIL WORKSHOP ITEM

ITEM: On-Call Street Light Maintenance
DATE: April 19, 2001
PREPARED BY: Jerry Sprecher
PURPOSE: Award a contract extension for this service.

DISCUSSION: Last year Fulton Contracting Company bid, and was awarded a contract for the provision of on-call street light repairs. As the “on call” suggests, this service is used primarily in the case of vehicle accidents resulting in light pole knock-downs, and at times when cable is cut by a contractor. Less frequently, we also have a few light poles that exceed in height our in-house capability to provide them routine maintenance. This year, and last, we budgeted \$12,000 for this service.

The contractor has offered to provide this service for the coming year at a 2% price increase. Unit prices are attached. Staff has been very satisfied with the service level of Fulton and recommends a contract extension for 2001/02.

ATTACHMENT:
Correspondence, unit pricing.

RECOMMENDATION:
It is requested that a contract extension be awarded to Fulton Contracting Co., Roselle, at the attached unit prices which represent a 2% increase over current costs.

RE: On-Call Street Light Maintenance

Dear Mr. Fitzpatrick:

Per the contract documents, Fulton Contracting would like to extend our current contract for one (1) year. The rates are based on a 2% increase of the unit prices. Enclosed is a new per hour price sheet noting this increase.

Should you have any questions or require further information, please contact me.

Sincerely,
FULTON CONTRACTING CO.

Other 50' Hi-Reach:	22.40	

Material cost plus 10 % overhead 10 % profit.

Increase for overtime rate 50 % Increase for Sundays, holidays 50 %

UNIT PRICES FOR POLE REPLACEMENT

The following unit prices are for street light pole replacement costs installed, where there is no damage to the foundations or anchor bolts. If the street light cable is slightly damaged where it exits the foundation and enters the pole, heat shrink shall be applied to the damaged cable, and will be included in the unit price, this does not include any damage to the cable that might occur between poles. The following items supplied and installed by the contractor shall be included in the unit price:

1. Street light pole & mast arm
2. High Pressure Sodium Fixture and Lamp
3. #10 THWN solid copper wire in pole
4. HEB-AA Fuse kit with 10 amp FNM fuse and protected by Buss 1A0512 rubber boots, 240 or 480 volt installations will require two sets of the above mentioned protectors.
5. Appropriate wire nuts, split bolt connectors and tape to reconnect pole wire to street light cable.
6. Removal and disposal of old street light pole and parts, unless the Village wants to retain such pole.
