JULY 5, 2011 AGENDA**

SUBJECT:	TYPE:	SUBMITTED BY:
Bid: 2011 Sidewalk Maintenance Program (S-006-11 & S-006-12)	✓ Resolution Ordinance Motion Discussion Only	Nan Newlon, P.E. Director of Public Works

SYNOPSIS

A motion is requested to authorize award of the following contracts for sidewalk maintenance:

- 2011 Replacement Sidewalk Program (CIP Project S-006-11) to M & A Cement Work, Inc. of Bensenville, Illinois in the amount of \$140,525
- 2011 Sidewalk Rehabilitation Project (S-006-12) to Safe Step LLC of Hortonville, Wisconsin in the amount of \$46,200

The total project cost is \$186,725.

STRATEGIC PLAN ALIGNMENT

The goals for 2011-2018 identified *Top Quality Village Infrastructure and Facilities*.

FISCAL IMPACT

The FY11 budget includes \$173,650 in the Capital Improvements Fund for S-006. The low bid for this project is \$13,075 more than the budgeted amount for this project. Staff recommends the use of the available fund balance in the Capital Fund to complete the scope of work included in these two contracts.

UPDATE & RECOMMENDATION

This item was discussed at the June 21, 2011 Village Council meeting. Staff recommends approval on the July 5, 2011 Consent Agenda.

BACKGROUND

The S-006-11 and S-006-12 projects provide for the replacement or rehabilitation of sidewalks with a grade difference of 1-1/8" or more (tripping hazards). The repair of cracked sidewalks is only done through the S-006-11 project, which calls for the removal and replacement of sidewalk squares. This year's program includes the removal and replacement of over 18,000 square-feet of sidewalk as well as intermittent curb replacement, and the upgrade of sidewalk ramps to comply with Americans with Disabilities Act standards.

This year's program includes a second contract which allows for costs savings by rehabilitating sidewalks instead of replacement to eliminate trip hazards. This involves cutting concrete with a special horizontal concrete saw. This work typically costs \$50 per location in lieu of \$150 for removal and replacement. This method of trip hazard removal exceeds ADA compliance, is cost effective, clean, and efficient.

This year's project will address approximately 500 locations throughout the Village.

Bids were received on Wednesday, June 1, 2011 for these contracts. A synopsis of each contract bid is as follows:

S-006-11 Replacement Sidewalk Program

M & A CEMENT	\$140,525

The notice shall identify the defect and any additional information necessary to correct it.

36.3 As this contract is for work defined as a "fixed public work" project under the Illinois Prevailing Wage Act, 820 ILCS 130/2, any contractor or subcontractor is required to submit certified payroll records along with the invoice. No invoice shall be paid without said records.

SP-1 SCOPE OF WORK

Description: Work involves removing approximately 2,100 inch-feet of public sidewalk trip hazards within Village right-of-ways at various locations by method of saw cutting. See Appendix A for location maps. The Contractor shall saw cut sidewalk trip hazards at locations designated and within the criteria established by these specifications.

SP-2 GENERAL CONSTRUCTION REQUIREMENTS

Description: The following general requirements are intended to govern the overall priority for the performance of the work described in this contract. As general requirements, they are not intended to dictate to the Contractor the precise method by which these tasks shall be performed.

All street openings made prior to November 15th shall be fully restored according to the applicable special provisions, and the street reopened to regular traffic upon the availability of hot-mix bituminous concrete.

No more than three hundred linear feet (300 LF) of pavement may be open-cut and closed to use by the motoring public. Access to **all** individual drives within the current work zone must be restored at the end of each workday.

The Contractor shall maintain traffic flow during the day in accordance with the applicable special provision. Adequate signing and flagging is of particular importance for safe travel of all residents.

SP-3 ACCESS AND WATER SHUT-OFF NOTIFICATION

Description: If access to a driveway will be blocked, or water will be turned off, the Contractor shall give that resident or business proper written notification at least 24 hours in advance. The Contractor must provide them the opportunity to remove their cars from the drive or make other arrangements, and prepare for any shutdown of the water system. Samples of written notices shall be submitted to the Engineer for approval.

In addition, the Contractor shall be responsible for notifying the resident or business verbally on the morning of any driveway closure, to ensure awareness of the lack of access.

Basis of Payment: This work shall be considered **INCIDENTAL** to the project.

SP-4 TREE PROTECTION

Description: Municipal Codes regarding trees, including tree protection requirements for public parkway trees, are located in Chapter 24 of the Downers Grove Municipal Code. Specifically, Municipal Codes 24-7 and 24-8 detail the public parkway tree protection sizes and fines for violations. The Village Forester shall approve all tree protection measures and any deviations. All tree protection measures and any deviations shall be noted in the contract specifications and on approved project plan sheets and permits using the guidelines listed below.

Tree protection shall include avoiding damage to the above ground tree branches and trunk, and the below ground root system and surrounding soil. Tree crowns and trunks shall not suffer any branch or bark loss.

Roots shall be protected from compaction, storage of materials, severing, regrading of the parkway or excavation unless specifically noted on the project plan sheets.

The Critical Root Zone, or CRZ, is the area immediately surrounding a tree that must be protected from damage. In a municipal parkway setting with utilities and paved or concrete surfaces, the size of the CRZ has been adjusted to form a rectangle around the parkway tree trunk with minimum dimensions listed in the following table. The depth of the CRZ extends to 4 feet below the natural ground surface level.

Parkway Tree diameter at 4.5'	Width street to property (min. curb to sidewalk)	Length along street street(minimum)	Depth
0 – 12.0 inches	10.0 feet	10 feet	4 feet
12.1 – 24.0 inches	10.0 feet	20 feet	4 feet
24.1 or more inches	10.0 feet	30 feet	4 feet

Village of Downers Grove

For projects that involve excavations of less than one (1) foot in depth in the parkway or street and are replacing structures in the same location, fencing of the public parkway trees shall not be required.

Example projects include, but are not limited to, street pavement resurfacing, curb removal/replacement, driveway removal/replacement, or sidewalk removal/repairs or new sidewalk installations.

Contractors shall be mindful of the CRZ dimensions and potential for fines if any parkway trees suffer any unauthorized damage as determined by the Village Forester.

For projects that involve excavations of two (2) or more feet in depth in the parkway or street or both, fencing of the public parkway trees shall be required. Example projects include, but are not limited to, watermain replacements with new roundway keystops and domestic service box installations, sanitary line replacements and new service connections, new or replacement natural gas services, new or replacement phone or fiber optic lines, or new or replacement storm sewers, or projects that widen roads which in turn decreases the parkway soil volume around public parkway trees.

Projects that require fencing (listed above) shall fence the public parkway trees with six (6) foot high chain link construction fence secured to metal posts driven in the ground which are spaced no further than ten (10) feet apart. The dimensions of the fence shall depend on the tree diameter size and shall follow the table listed for the CRZ above, or as large as practical dependent on driveways and other field conditions. The fenced rectangle shall have three (3) sides with the opening facing the adjacent residences for easy access for mowing or tree care. Under no circumstances shall any items be stored within the fence. All fence shall be maintained daily in an upright good condition. The size and location of all fencing shall be shown on the project plan sheets.

To avoid damage to the CRZ, utilities must be augered underneath the public parkway trees.

Excavation pits for augering equipment are to be outside the fenced area and are to be shown on the project plan sheets. Excavation pits for roundway keystops and domestic service boxes are to be as small as practical with excavation occurring in a direction away from the adjacent public parkway tree.

In cases when severing of roots within a portion of the CRZ may be unavoidable (ex. sidewalk installation, curb replacement, water or sanitary service replacement), subject to the approval of the Village Forester, sharp clean cuts shall be made on root ends to promote wound closure and root regeneration. Root pruning and excavation activities shall occur such that the smallest volume of soil and roots is disturbed, and the locations shall be shown on the project plan sheets.

In addition to fines and citations that may be assessed for violations of any Chapter 24 of the Municipal Code (such as not maintaining fencing around the CRZ or unauthorized removal of protected trees), the contractor may be subject to the following provisions:

1. Issuance of an invoice for the value or partial value of the tree lost due to damage to either the above ground or below ground portions of the parkway tree, or unauthorized tree removal.
2. Costs of repairs, such as pruning or cabling, or costs for removal of the damaged parkway tree along with the stump if the tree cannot remain in the right-of-way.
3. Fines of \$500 for the 1st offense; \$1,000 for the 2nd offense; \$2,500 for the 3rd and subsequent offenses.
4. Each day during which a violation continues shall be construed as a separate and distinct offense.

SP-5 EROSION AND SEDIMENTATION CONTROL

Description: Throughout each and every phase of the project, all downstream ditches and storm sewers shall be protected from the run-off of roadway surfaces, excavations, and other construction activities generating the movement of dirt, mud, dust and debris. This work shall consist of constructing temporary erosion and sedimentation control systems as shown on the plans or as directed by the Engineer. The work shall be placed by methods and with materials in accordance with Sections 280, 1080 and 1081 of the SSRBC, except as amended herein.

Erosion and sedimentation control measures as indicated in the Erosion Control Plan, or as directed by the Engineer shall be installed on the project site prior to beginning any construction activities which will potentially create conditions subject to erosion. Erosion control devices shall be in place and approved by the Engineer as to proper placement and installation prior to beginning other work.

Erosion control protection for Contractor equipment storage sites, plant sites, and other sites shall be installed by the Contractor and approved by the Engineer prior to beginning construction activities at each site.

SP-6 TRAFFIC CONTROL, MAINTENANCE OF TRAFFIC, DETOURS (ITEM# 70103900)

Description: This item shall include the furnishing, installing, maintaining, relocating and removing of all traffic control devices and personnel used for the purpose of regulating, warning, or directing traffic during the construction of this project.

All traffic control devices used on this project shall conform to the Standard Specifications for Traffic Control Devices and the Illinois Manual on Uniform Traffic Control Devices.

No waiving of these requirements will be allowed without prior written approval of the Engineer.

The Contractor shall protect all workers engaged in the project, and shall provide for safe and convenient public travel by providing adequate traffic control under all circumstances.

Such circumstances may include, but not be limited to work performed along the route under construction, road closures for construction operations of any type, or when any section of the road is opened to traffic prior to completion of all work. The Contractor shall ensure that work zone in question is properly signed, barricaded and otherwise marked.

The contractor will be responsible for the proper location, installation, and arrangement of all traffic control devices during the period of construction. All open excavations shall be protected by Type I barricades equipped with working bi-directional flashing lights at each end of the excavation, as well as at 50-foot intervals between ends for excavations greater than 50 feet in length and weighted down by **one sandbag per each barricade**. All street closures shall be protected by Type III barricades equipped with working bi-directional flashing lights and weighted down by **eight sandbags per each barricade**.

The Contractor shall plan his work so that there will be no open excavations during non-working hours and that all barricades not necessary have been removed from the pavement during non-working hours.

In the event that one direction of vehicular travel must be closed, the Contractor has the option of setting up a detour route or using flaggers (minimum of two) to direct traffic around the work area. The Engineer shall approve proper signing and barricading of the detour route and lane closures, and shall issue written authorization prior to closure.

In the event that both directions of vehicular travel must be closed, the Contractor shall set up a detour route to direct traffic around the work area. The Engineer shall approve proper signing and barricading of the detour route and shall issue written authorization prior to closure.

The Contractor shall maintain his operations in a manner such that traffic flow shall not be substantially impeded during the construction of the proposed improvements. Where traffic must cross open trenches during a given work day, the Contractor shall provide steel plates at street intersections and driveways. Prior to the end of a given work day, the pavement surface shall be temporarily restored.

No open excavation may be left overnight or on the weekend without the express written permission of the Engineer.

No street closure shall be permitted without the express written permission of the Engineer. No street closure may exceed 800 linear feet, nor be in effect from Friday night at 4:30PM to Monday morning at 9:00AM. Where it is necessary to establish a temporary detour, all the requirements of the Standard Specifications and MUTCD shall be met.

As the condition and location of the work changes, the Contractor shall maintain all traffic control devices and personnel engaged in traffic control, in a manner that will accommodate the changing particulars of the work at any given time.

Advance warnings, detour and directional information and other controls or directions necessary for safe passage of traffic around the work site shall be reviewed and changed, if necessary, to meet the needs of the situation.

Signage erected, but not necessary or proper for the situation ahead shall be covered or taken down. Barricading and signage shall be monitored by the Contractor on a daily basis to ensure that it meets the requirements for work zone safety for the conditions of the particular work being performed.

The Contractor shall provide a name and phone number of a responsible party capable of providing emergency service, 24 hours per day, for the duration of the Project.

Basis of Payment: This work shall be considered **INCIDENTAL** to the project.

SP-7 SCHEDULING OF CONSTRUCTION

A construction schedule shall be submitted by the Contractor to the Engineer at the scheduled pre-construction meeting. **The contractor shall only be allowed to conduct his operations in the Downtown Business District (DBD) between the hours of 9:00 a.m. & 3:00 p.m. Monday through Friday.** **Also, any and all construction operations in the DBD shall be completed prior to the list of events noted in Appendix A of these specifications.**

SP-8 QUALIFICATIONS OF CONTRACTOR

Description: Any contractor submitting a bid on this project must demonstrate competence, reliability, and be actively engaged in this specific type of work. The contractor must demonstrate competence prior to submitting a bid by including a history and references, listing completion dates, and submitting bonding information from prior projects, and/or performing an on-site demonstration of their capacity to perform the work as required. The Village reserves the right to disqualify a bid and/or contractor if they are deemed not to be competent or reliable. The Village also reserves the right to select the bid deemed to be most advantageous to the Village.

SP-9 SCHEDULES AND RESTRICTIONS

Description: The Contractor shall submit a schedule showing anticipated dates for work. The Village reserves the right to require adjustments to quantities and scheduling of work. The Contractor shall also make special note of the following requirements.

All construction work specified under this contract shall be so engaged as to not impede normal traffic and pedestrian ways. Any barricading to detour traffic must receive prior approval from the Engineer.

Special consideration to hours and location of work near schools shall be made to allow for full and safe access during normal student arrival and departure schedules.

Unless otherwise directed by the Engineer, all construction work shall be done such that continuous access to schools or businesses is maintained. Access to residential property may be temporarily curtailed during the hours of 8:00 a.m. to 7:00 p.m. local time only when necessitated by work in progress immediately adjacent to driveways. However, in all cases, unless otherwise directed by the Engineer, total access must be restored to all types of properties over weekends and legal holidays (7:00 p.m. local time Friday to 8:00 a.m. local time Monday, or until 8:00 a.m. local time the day following a legal holiday).

2011-2015 Capital Project Sheet

Project # **S-006**

Project Description **Replacement Sidewalk Program**

Project summary, justification and alignment to Strategic Plan

This project provides for the replacement of sidewalks with a grade difference of 1-1/8" or more (tripping hazards) as well as repair of sidewalk which has cracked into more than three pieces. The Village maintains over 5 million square feet (SF) of sidewalk which has a life expectancy of 50 to 100 years. Beginning in FY2009, a 5% escalator was included to reflect increasing costs for sidewalk construction.
