BACKGROUND

The 2021 vehicle replacement schedule provides for the replacement of the following vehicles and equipment.

Quantity	Type of Vehicle	Make and Model	Dealer	Price per vehicle
4	Utility	2021 Ford Police Interceptor Utility Hybrid	National Auto Fleet Group	\$51,118.92 Total: \$204,475.68
6	Utility	2021 Ford Escape Hybrid	National Auto Fleet Group	\$31,901.10 Total: \$191,406.60
1	N/A	Genetec AutoVu SharpZ3 License Plate Reader	Minuteman Security Technologies	\$24,924.33 Total: \$24,924.33
1	Van	2021 Ford Transit Cargo	National Auto Fleet Group	\$40,479.48 Total: \$40,479.48

The Village's Fleet Team, consisting of representatives from the Village Manager's Office, Finance, Public Works, Police and Fire Departments evaluated the need to replace these vehicles. All Village vehicles and equipment are targeted for replacement according to useful lifecycle replacement criteria. These criteria include age, usage, condition, repair costs, fuel efficiency and environmental impact. The Fleet Team reviewed the above listed vehicles scheduled to be replaced and determined that the criteria for replacement were met. The FY21 budget also includes the refurbishment of two snow plow trucks, one concrete saw, an additional Escape Hybrid, and a full-size van. These additional replacements are being further evaluated and if it is determined that replacement is appropriate in FY21 they will be brought forth for consideration at a later date.

Police Vehicles

A typical patrol car has a planned useful life of 6 years depending on use. For 2021, seven police vehicles are scheduled for replacement, four that are used by Patrol, two by Detectives and one by Community Service Officers. The Patrol Officers are currently driving Chevy Tahoes and the recommended replacement vehicle is a Ford hybrid electric utility. The 2021 Police Interceptor Utility Hybrid delivers an estimated 41% improvement in fuel economy over the current Police Interceptor Utility. According to the manufacturer, projections indicate the hybrid could help save between \$3,500 and \$5,700 per vehicle annually in fuel costs. Hybrid technology is ideal for law enforcement because of the potentially significant idle-time fuel savings. When police vehicles are stationary, a conventional gasoline engine must run continuously to power emergency lighting, radios, computers and other on-board electrical equipment. The hybrid powertrain of the Police Interceptor Utility allows the engine to shut off for extended periods, powering electrical equipment via its lithium-ion battery and helping achieve significant reductions in fuel usage and CO₂ emissions over the previous generation Police Interceptor Utility.

Similar benefits and results are expected from the Ford Escape hybrid for the Community Service Officer conducting parking enforcement. In addition to the vehicle, a replacement license plate reader is required to assist with parking enforcement. The original license plate reader is obsolete and approximately ten (10) years old. In 2019 and 2020 parking enforcement issued over 6,300 citations. A request for proposal was completed and reviewed by staff. The Genetec AutoVu SharpZ3 module with two cameras, offered by Minuteman Security Technologies, was selected. Licensing, mapping and a warranty are included. This model provides functionality that no other vendor is able to provide.

The recommended vehicles meet the operational needs of the department and support the Village's goal to operate a greener fleet. The table below provides additional information regarding the existing police vehicles scheduled to be replaced:

Veh. Unit #	Year	Make	Model	Miles (Dec 2020)	2019-2020 Repairs / Maintenance Costs (24 mo.)	Life-to-Date Repairs / Maintenance Costs	Repairs / Maintenance Cost % in 2019-2020

800	2012	Chevy	Tahoe (LPR)	96,851	\$3,090	\$12,038	26%

*Unit #800 has an obsolete license plate reader past its useful lifecycle and is scheduled for replacement

Fire Vehicles

Fire Prevention Vehicle

The current Fire Prevention vehicle is a 16 year old Ford Taurus that has been out of service due to a previous accident. The recommended vehicle is a Ford Escape Hybrid utility, which will accommodate the gear needed for fire prevention inspections and fire safety. This hybrid vehicle will be economical, provide for reduced fuel costs and is in line with the Village's green fleet. The following table provides additional information regarding the vehicle scheduled to be replaced.

Veh. Unit #	Year	Make	Model	Miles (Dec 2020)	2019-2020 Repairs / Maintenance Costs (24 mo.)	Life-to-Date Repairs / Maintenance Costs	Repairs / Maintenance Cost % in 2019-2020
927	2005	Ford	Taurus	68,783	\$3,730	\$17,733	21%

Public Works Vehicles

Ford Escape Hybrid

The vehicle proposed for replacement (105) is a 20 year old Honda Civic that is used in Public Works by the engineering division for traveling to job sites and overseeing capital projects. This vehicle carries surveying equipment and the tools and equipment needed by staff to complete various tasks. The current vehicle is a CNG vehicle, which has expired fuel tanks and is beyond its useful service life. The recommended replacement vehicle is a Ford Escape Hybrid. This hybrid vehicle will be economical, provide for reduced fuel costs and is in line with the Village's green fleet.

Ford Transit Cargo Van

The vehicle proposed for replacement (116) is an eight year old Ford E-250 van that is used in Public Works by PSRT (Public Service Response Team) for responding to public service requests for animal control, street light repairs, after hours public works calls for water issues, barricades, and assistance to police and fire. This truck is equipped with the tools and equipment needed by staff to complete those various tasks. The current vehicle is experiencing high maintenance costs and is beyond its useful service life. The recommended replacement vehicle is a Ford Transit Cargo Van.

Ford Escape Hybrid

The vehicle proposed for replacement (182) is a 13 year old Ford Escape Hybrid that is used in Public Works by the Village Forester for traveling to job sites and overseeing the daily operations of the forestry division. This vehicle carries the tools and equipment needed by staff to complete various tasks. The current vehicle has reached the point where maintenance costs are starting to increase substantially. It is recommended to replace it now to gain the increased fuel efficiency of the newer hybrid system and avoid impending major repairs to the existing vehicle. The recommended replacement vehicle is a Ford Escape Hybrid.

The following table provides additional information regarding the vehicles scheduled to be replaced.

Veh. Unit #	Year	Make	Model	Miles (Dec 2020)	2019-20 Repairs / Maintenance Costs (24 mo.)	Life-to-Date Repairs / Maintenance Costs	Repairs / Maintenance Cost % in 2019-20
105	2001	Honda	Civic	45,769	\$1,932	\$22,414	9%
116	2013	Ford	E250 Van	80,869	\$12,737	\$25,919	50%
182	2008	Ford	Escape	48,493	\$2,440	\$7,938	31%

These vehicle purchases are recommended to be made through cooperative purchasing contracts in accordance with the provisions of the Village Purchasing Policy. The Ford Police Interceptor Utility Hybrids, Ford Escape Hybrid and Ford Transit Cargo Van would be purchased through the Sourcewell Cooperative Purchasing Program for governmental entities (formerly NJPA.).

The SharpZ3 is powered by the Intel® Movidius™ Myriad™ X VPU. Designed to deliver high-performance processing at the edge, it takes advantage of the latest machine learning technologies to redefine what mobile ALPR can do. With its third optical sensor, it can precisely position objects and vehicles around the license plate to understand the context of each read. With its modular design, the SharpZ3 gives users the flexibility to add new functionalities over time.

Features

Powered by AutoVu MLC machine learning based engine

Built-in suite of vehicle analytics: Country of origin, state, vehicle type, color, and object distance detection

Ultra-low reading latency

3 optical sensors

Modular chassis

Optional advanced GPS positioning with dead reckoning

Up to 4 high-definition ALPR cameras on the same base unit

Unified with Genetec Security Center

Get more from your mobile ALPR system

Go beyond conventional mobile ALPR

The SharpZ3 system is built on deep neural network architecture to unlock new insights through innovative analytics. These include vehicle type, color, state, and object distance detection. The deep learning capability also allows the system to deliver higher accuracy and capture rates while reducing misreads.

Capture the full picture

The third sensor embedded in the SharpZ3 helps it accurately capture multiple plate designs in complex urban environments. These include flat, embossed, reflective and non-reflective license plates. The extra sensor also allows stereoscopic distance determination of objects detected.

Evolve your system with ease

The SharpZ3 is designed with growth in mind. The modular chassis of the SharpZ3 will protect your investment and let you tap into new modules and capabilities over time. This reduces the complication and cost of hardware replacement.
